1. Scope

The scope of this policy applies to the premises of Oldbury Cottage Care Farm CIC (OCCF) and all persons on the premises.

All staff and volunteers (workers) at OCCF have individual responsibilities to take reasonable care for their own health and safety and for that of others who might be affected by their acts or omissions. They must co-operate with those persons who are responsible for health and safety to enable them to carry out their duties.

2. Purpose

In order to work in a safe environment certain measures must be taken by staff and volunteers. This is also for the purpose of the safety of visitors to the site.

Furthermore, **The Health and Safety at Work etc. Act 1974** is an Act of Parliament that as of 2011 defines the fundamental structure and authority for the encouragement, regulation and enforcement of workplace health, safety and welfare within the United Kingdom. The Act defines general duties on employers, employees, volunteers, contractors, suppliers of goods and substances for use at work, persons in control of work premises, and those who manage and maintain them, and persons in general. The Act established a system of public supervision ultimately backed by criminal sanctions extending to unlimited fines and imprisonment for up to two years.

Other relevant legislation

- The Management of Health and Safety at Work Regulations 1999
- The Regulatory Reform (Fire Safety) Order 2005
- Reporting of Injuries, Diseases and Dangerous Occurrences Regulations, 1995
- Health and Safety First Aid Regulations, 1981
- Working Time Regulations
- The Food Safety Act 1990

3. Policy Statement

It is the policy of OCCF to promote the health and safety of all people on its premises and for that purpose it will:

Take all reasonably practicable steps to safeguard the health, safety and welfare of all personnel on the premises.

Provide adequate working conditions with proper facilities to safeguard the health and safety of personnel and to ensure that any work which is undertaken produces no unnecessary risk to health or safety:

- Display the HSE poster entitled 'Health and Safety Law'
- Encourage persons on the premises to co-operate with the Farm in all safety matters, in the identification of hazards which may exist and in the reporting of any condition which may appear dangerous or unsatisfactory
- Encourage everyone to accept their own responsibility not to endanger themselves or others and to assist actively in fulfilling the requirements and spirit of legislation and good practice
- Ensure the provision and maintenance of plant and other equipment and systems of work that are safe
- Maintain safe arrangements for the use, handling, storage and transport of articles and substances
- Provide sufficient information, instruction, training and supervision to enable everyone to avoid hazards and contribute to their own safety and health
- Provide specific information, instruction, training and supervision to personnel who have particular health and safety responsibilities (eg a person appointed as a Health and Safety Officer or Representative)
- Make, as far as is reasonably practicable, safe arrangements for protection against any risk to health and safety of the general public or other persons that may arise from the Farm's activities
- Make suitable and sufficient assessment of the risks to the health and safety of employees and of persons not in the employment of the Farm arising out of or in connection with the Farm's activities
- Assessment of risks in respect of attendees, new or expectant mothers and young people under the age of eighteen
- Provide information to other employee's/volunteers of any risks to which they may be exposed to when on the Farm's premises.

This policy statement and the procedures for its implementation may be altered at any time by the Farm's Directors. The statement and the procedures will be reviewed every year by the Farm's Directors.

4. Statutory Duties

4.1 Duties of the organisation

OCCF will comply with its duty to ensure, as far as is reasonably practicable, the health, safety and welfare at work of its workers and of visitors to its premises and, in general, to:

- Ensure plant and machinery are safe and that safe systems of work are set and followed:
- Ensure articles and substances are moved, stored and used safely;
- Provide adequate welfare facilities:
- Give workers and attendees the information, instruction, training and supervision necessary for their health and safety.

In particular, OCCF will:

- Make arrangements for implementing the health and safety measures identified as necessary by this assessment
- Record the significant findings of the risk assessment and the arrangements for health and safety measures
- Provide health and safety procedures and arrangements in force, and bring it to the attention of its workers
- Set up emergency procedures
- Provide adequate first aid
- Make sure that the workplace satisfies health, safety and welfare requirements, e.g. for ventilation, temperature, lighting and for sanitary, washing and rest facilities
- Make sure that work equipment is suitable for its intended use, as far as health and safety is concerned, and that it is properly maintained
- Prevent or adequately control exposure to substances that may damage health
- Take precautions against danger from flammable or explosive hazards, electrical equipment, noise or radiation
- Avoid hazardous manual handling operations and where they cannot be avoided, reduce the risk of injury
- Provide health surveillance as appropriate
- Ensure that appropriate safety signs are provided and maintained:
- Report certain injuries, diseases and dangerous occurrences to the appropriate health and safety enforcing authority.

4.2 Duties of Employees and Volunteers

Employees/volunteers also have legal duties. The organisation expects non-employed (voluntary) workers also to observe these. They include the following:

- To take reasonable care for their own health and safety and that of other persons who may be affected by what they do or do not do
- To co-operate with OCCF on health and safety
- To use work items provided by OCCF correctly
- Not to interfere with or misuse anything provided for health, safety and welfare purposes
- To report at the earliest opportunity injuries, accidents or dangerous occurrences at work, including those involving the public and participants in activities organised by the OCCF.

4.3 Duties of Visitors and Contractors

General visitors to OCCF should take reasonable care of themselves and any accompanying dependents (particularly young children).

Visitors for specific activities or meetings should be directed on arrival to the appropriate member of staff or group leader. This person will take responsibility for the visitor(s) and assist in their evacuation from the building during an emergency or arrange help in the event of an accident.

Contractors working in the building should report any concerns relating to their own safety or suspected unsafe working practices to the OCCF Manager. The OCCF Manager will investigate and liaise with the Directors.

5. Organisation of Health and Safety

The Directors and Manager will be responsible for the Health and Safety, including representation for both themselves and for staff:

- To have a broad overview of Health and Safety matters
- To keep OCCF's Health and Safety policy and procedures under review
- To conduct safety tours of the premises
- To ensure that risk assessments are carried out, including assessments regarding substances hazardous to health (COSHH Regulations - see Policy)
- To take such action as may be required to ensure that the Farm's responsibilities for Health and Safety are fulfilled and
- To report to the Directors on their performance of these responsibilities.

The Directors shall carry out regular safety tours and inspections of the premises. All necessary actions as a result of the tour shall, where reasonable and practicable, be implemented. The tour shall include inspection of the accident books.

6. Health and Safety Rules

All workers must exercise ordinary care to avoid accidents in their activities at work and comply with the following general rules and with any further rules which OCCF may publish from time to time.

- Accident Book – Any injury suffered by a worker or visitor in the course of employment or otherwise on OCCF's premises, however slight, must be recorded, together with such other particulars as are required by statutory regulations, in the accident book maintained by OCCF and or in electronic format.
- Fire Procedures – All personnel must familiarise themselves with fire escape routes and procedures and follow the directions of the Farm in relation to fire.
- Equipment and Appliances – No equipment or appliance may be used other than as provided by or specifically authorised by or on behalf of the Farm and any directions for the use of such must be followed precisely.
- Safety Clearways – Corridors and doorways must be kept free of obstructions and properly lit.
- Maintenance – Defective equipment, furniture and structures must be reported as such without delay.
- Hygiene and Waste Disposal – Facilities for the disposal of waste materials must be kept in a clean and hygienic condition. Waste must be disposed of in an appropriate manner and in accordance with any special instructions relating to the material concerned.

6.1 Food Hygiene

The main responsibilities for all food businesses under the Food Safety Act 1990 are:

- To ensure you do not include anything in food, remove anything from food or treat food in any way which means it would be damaging to the health of people eating it
- To ensure that the food you serve or sell is of the nature, substance or quality which consumers would expect
- To ensure that the food is labelled, advertised and presented in a way that is not false or misleading

Specific hygiene requirements when handling or preparing food include:

- Regularly wash hands before and during food preparation and always after using the lavatory
- Tell your supervisor of any skin, nose, throat or bowel problem
- Ensure cuts or sores are covered with waterproof dressings
- Keep yourself clean and wear clean clothing

- Ensure waste food is disposed of properly. Keep the lid on the rubbish bin and wash your hands after putting waste in it
- Avoid handling food as far as possible
- Tell your supervisor if you cannot follow the rules
- Advise your supervisor of any defects or concerns regarding the facilities - e.g. uncleanness, refrigeration malfunction or cracked food preparation surfaces.

Refer to Food and Hygiene policy.

6.2 Display Screen Equipment and Workstations

OCCF recognises its responsibility to ensure the well-being of workers who habitually use display screen equipment for a significant part of their normal work. Workers are advised to ensure that they take a five-minute break from the display screen equipment at least once an hour and are advised that, if they experience vision defects or other discomfort that they believe may be wholly or in part a consequence of their use of such equipment, they have the right to an eye-test at OCCF's expense. Some workers may experience upper limb problems and backache from overuse or improper use of DSE. These problems can also be experienced from poorly designed workstations or work environments. The causes may not always be obvious and can be due to a combination of factors.

Employers, employees and volunteers should work together to find an appropriate set up for computer use often following a workstation assessment.

Refer to Policy.

6.3 Alcohol, Vaping, Drugs and Tobacco

The Farm operates a Smoke Free, Vape free policy across the site. The use of drugs (except under medical supervision) on the premises are prohibited at all times. The use of intoxicants is prohibited during working hours and no employee may undertake their duties if under the influence of alcohol or drugs, except under medical supervision. For more detailed information on the Farm's stance towards alcohol, drugs and tobacco on its premises, please refer to policy.

6.4 Arrangements and Procedures

Directors are responsible for ensuring that the safety policy is carried out and that responsibilities for safety, health and welfare are properly assigned and accepted at all levels. Day-to-day responsibility for ensuring that policy is adhered to and that updates are scheduled is delegated to the OCCF Manager.

7. First Aid and Accident Reporting

7.1 First Aid

An assessment has been made as to the first aid requirements on site. A staff member is first aid trained to a 'first aid at work' level.

First Aid Boxes are provided in the following locations:

- Farm Office
- Food Area
- Barn

7.2 Accidents

- In the event of an injury or illness, call for a member of staff or ring for an ambulance directly. To call an ambulance, dial 999 or 112 and ask for 'ambulance'.
- All accidents must be reported to the member of site operations staff on duty immediately or as soon as practicable.
- All accidents must be entered in the appropriate incident/accident book. This is situated in the Farm Office – duplicates can be given to the individual and a duplicate must be kept on site.
- The OCCF Manager will investigate incidents and accidents, reviewing this for the Farm's Health and Safety Directors, to consider the actions necessary to prevent a recurrence.

8. Fire Drills and Evacuation Procedures

8.1 Fire Drills

- All workers must know the fire procedures, position of fire appliances and escape routes.
- The fire alarm points, fire exits, and emergency lighting system will be tested by a Director or Manager during the 1st week of the month and entered in the logbook provided.
- The OCCF Manager will arrange for Fire Drills and Fire Prevention Checks (see below) to be carried out at least quarterly and entered in the logbook.
- The last person securing the premises will ensure Fire Prevention Close-Down Checks are made of all parts of the premises at the end of a session.

8.2 In the event of fire

Persons discovering a fire should sound the nearest alarm.

- The first duty of all workers is to evacuate all people from the building by the nearest exit immediately after the fire is discovered.
- All persons must evacuate the building and, where possible without personal risk, leave all doors and windows closed.
- There are two fire assembly points depending on where the fire is located:

POINT A - is located by the green shipping container.

POINT B - is located in the car park by the lamp post.

- No-one should leave the assembly point without the permission of a member of staff.
- If any fire occurs, however minor, the Fire Service must be called immediately by dialling 999 or 112 and asking for 'Fire Service'.
- When the Fire Service arrives advise whether all persons are accounted for and location of fire.

9. Bomb Warnings

- If you receive a warning, try to find out from the caller – the location of the bomb and likely time of detonation:
 - Whether the police and fire brigade have been notified.
 - Try to record exactly what is said.
- Notify the Police immediately on 999.
- DO NOT SOUND THE FIRE ALARM but evacuate the building taking into consideration any information from the bomb warning.
- Assemble at the same place as the fire assembly unless bomb warning implies otherwise.
- Use workers evacuation code 'black'.

10. Cleaning Materials, General Machinery & High-Risk Areas

- All portable machinery must be switched off and unplugged when not in use.
- Cables are a hazard; be aware and keep safety in mind.
- Slippery floors are dangerous; use warning signs.
- Use protective clothing and equipment provided and as instructed on machinery/equipment/material. It is the duty of a worker to report any loss of or defect in protective clothing or equipment.

11. General

- All thoroughfares, exits and gates must be left clear at all times.
- All fences, gates and equipment in use inspected daily.
- Corridors and fire exits must not be blocked by furniture or equipment.
- Vehicles must not be parked near to the building to cause any obstruction or hazard.

Hazards or suspected hazards or other health and safety matters should be reported to the Manager immediately or as soon as practicable, so that action can be taken. If the hazard is of a serious nature, immediate action must be taken to protect or clear the area to prevent injury to staff or other users.

11.1 Accident Reporting

All accidents which occur during work for the Farm or on premises under the control of the Farm must be recorded.

11.2 Accidents to Workers or Contractors' Staff

(a) For ALL accidents
Complete the accident book.

(b) For accidents reportable to the Health & Safety Executive (for contractors see c) below)

If an accident results in incapacity for work for more than 7 calendar days then complete form F2508 <https://www.hse.gov.uk/forms/incident/index.htm> with copies to:

Health & Safety Executive, 19 Ridgeway, 9 Quinton Business Park, Quinton, Birmingham, B321AL and the Manger or Directors.

If accident results in fatality, fracture, amputation or other specified injury then immediately notify:

Health & Safety Executive and the Farm Manager/Directors.
Follow up within seven days with completed F2508 with copies to:
Health & Safety Executive and the Manager/Directors.

(c) Contractors

If a reportable accident involves a contractor's employee and the premises are under the control of someone other than the contractor then the person in control of the premises is responsible for reporting the accident.

If a contractor's employee is at work on premises under the control of the contractor, then it is the contractor or someone acting on his/her behalf that is responsible for reporting the accident.

11.3 Accidents involving Members of the Public

(a) For ALL accidents

Complete the accident book.

(b) For accidents reportable to the Health & Safety Executive

If accident results in fatality, fracture, amputation or other specified injury then immediately notify:

Health & Safety Executive, the Chief Executive, the OCCF Manager and Directors. Follow up within seven days with completed F2508 with copies to Health & Safety Executive, the OCCF Manager and Directors.

Some injuries may not be fully identified until the casualty has been to hospital. It is therefore essential that, if it is known that an individual has gone to hospital as a result of an accident, follow up action is carried out.

11.4 Definition of Specified Major Injuries or Conditions

- Fracture of the skull, spine or pelvis; any bone in the arm or wrist but not a bone in the hand; any bone in the leg or ankles but not a bone in the foot.
- Amputation of: a hand or foot, a finger, thumb or toe; or any part thereof if the joint or bone is completely severed.

Other specified injuries and conditions:

- The loss of sight in an eye; a penetrating injury to the eye, or a chemical or hot metal burn to an eye.
- Injury (including burns) either requiring immediate medical treatment, or involving loss of consciousness, resulting (in either case) from electric shock from any electrical circuit or equipment, whether or not it is due to direct contact.
- Loss of consciousness resulting from lack of oxygen.
- Decompression sickness requiring immediate medical treatment.
- Either acute illness that requires treatment, or a loss of consciousness, resulting (in either case) from absorption of any substance by inhalation, ingestion or through the skin.

- Acute illness requiring medical treatment where there is reason to believe that this resulted from exposure to a pathogen or infected material.
- Any other injury which results in the person injured being admitted immediately into hospital for more than 24 hours.

11.5 Dangerous Occurrences

In the event of any of the following:

- Collapse/overturning of machinery
- Explosion/collapse of closed vessel/boiler
- Electrical explosion/fire

Notify the following immediately: Health & Safety Executive, the OCCF Manager and Directors.

11.6 Occupational Diseases

- Poisoning
- Skin Diseases
- Lung Diseases
- Infections

On receipt of a written diagnosis from a doctor, report the disease using form F2508A to: Health & Safety Executive, the OCCF Manager and Directors.

Full details of Dangerous Occurrences and Occupational Diseases can be found in the HSE Guide to RIDDOR.

11.7 Control of Substances Hazardous to Health (COSHH Regulations)

Assessment

The assessment must be a systematic review.

- What substances are present?
- In what form?
- What harmful effects are possible?
- Where and how are the substances used or handled?
- What harmful effects are given off?
- Who could be affected, to what extent and for how long?
- Under what circumstances?
- How likely is it that exposure will happen?
- What precautions need to be taken to comply with the COSHH Regulations?

- What procedures need to be put in place to comply with the Control of Asbestos Regulations 2006?

Prevention or Control

Employers must ensure that the exposure of workers to hazardous substances is prevented or, if this is not reasonably practicable, adequately controlled.

Based on the assessment, the employer/volunteer has to decide which control measures are appropriate to the work situation in order to deal effectively with any hazardous substances that may be present.

This may mean preventing exposure by:

- removing the hazardous substance
- changing the process
- substituting with a safe or safer substance, or using a safer form

Or, where this is not reasonably practicable, controlling exposure by, for example: – totally enclosing the process:

- using partial enclosure and extraction equipment
- general ventilation
- using safe systems of work and handling procedures

It is for the employer/volunteer to choose the method of controlling exposure and to examine and test control measures if required.

The Regulations limit the use of Personal Protective Equipment (e.g. respirators, dust masks, protective clothing) as the means of protection to those situations ONLY where other measures cannot adequately control exposure.

Employers must provide any of their workers and, so far as is reasonably practicable, other persons on site who may be exposed to substances hazardous to health, with suitable and sufficient information, instruction and training so that they know the risks they run and the precautions they must take.

Employers must ensure that anyone who carries out any task in connection with their duties under COSHH has sufficient information, instruction and training to do the job properly.

11.8 Health and Safety Inspections

A health and safety inspection and maintenance check of the building is undertaken regularly by the Directors and logged. Upon the inspection finding any issues of urgency, action will be taken to make an immediate reasonable response and recorded upon completion.

While the health and safety inspection relates particularly to the building, the risk assessment form relates to activities within it. Risk assessments need to be carried out in relation to every activity undertaken, whether by groups or individuals, and including the work of paid staff and volunteers.

Special attention should be paid to the circumstances of expectant mothers, women who have given birth within the past six months or who are breastfeeding being around pregnant ewes on the farm.

A risk assessment needs to be carried out whenever a new activity is envisaged, and assessments need to be repeated whenever circumstances change: e.g. following:

- changes in layout of equipment
- observing trends in the accident book
- recent training (to check its effectiveness)
- changes in legislation
- changes in staff
- an accident or incident
- introduction of new equipment, procedures, processes or materials
- changes in staff circumstances – e.g. becoming pregnant

11.9 Fire Prevention

Buildings have been assessed to ascertain:

- The number and width of escape routes to provide a ready means of escape from the premises
- Emergency lighting and its maintenance
- The most suitable way of raising an alarm in the event of fire
- The contents of fire instruction notices
- The numbers and types of fire extinguishers or other fire-fighting appliances provided

- Precautions to be taken with any activities involving the use of flammable liquids, naked flames or heating processes
- The escape routes kept usable
- Seating and gangways in the hall/rooms arranged to allow free and ready access direct to fire exits

- Exit doors always unlocked before the start of any session and kept unlocked until the last person leaves
- Escape routes and exit doors clearly sign-posted and marked so that anyone not familiar with the building can quickly see the ways out
- Escape routes and exit doors never allowed to become obstructed or hidden by chairs or curtains

Equipment

- Fire extinguishers, and fire alarm systems (where provided) regularly maintained by specialist fire engineering firms
- Staff and volunteers are trained to use this equipment
- Equipment kept in its proper position and always clearly visible and unobstructed

Close-down checks

- No smouldering fires are left burning on the farm
- Heaters and cookers turned off
- Televisions and other electrical apparatus turned off and unplugged
- Lights off
- Internal doors closed
- Outside doors and windows closed and secured

Preventative measures

- Smoking not allowed on site
- Portable heaters are securely fixed and kept away from combustible materials
- Precautions to ensure that convector type heaters are not covered with clothes and curtains
- Sufficient socket outlets provided to obviate the need for long trailing flexes
- Damaged leads replaced
- Cooking operations supervised by a reliable person
- All parts of the premises kept clear of waste and rubbish, storerooms, attics and boiler rooms

11.10 Display Screen Equipment

Who is a display screen user?

The regulations are for the protection of workers who habitually use display screen equipment for a significant part of their normal work.

In some cases, it will be clear that the use of Display Screen Equipment is continuous on most days and the individuals concerned should be regarded as users. Where use is less continuous, 'user' status would apply if most or all the following criteria are met, the individual:

- has no discretion as to the use or non-use of the display screen equipment
- needs significant training and/or skills in the use of display screen equipment to do the job
- normally uses display screen equipment for continuous spells of an hour or more
- uses display screen equipment in this way daily

There is no reliable evidence that work with a display screen causes any permanent damage to eyes or eyesight, but it may make the user with pre-existing vision defects more aware of them. This may give rise to visual fatigue and headaches. It is worth noting that these symptoms can also be due to poor lighting, incorrect posture, poor workstation layout, design or maintenance of hardware or other problems. All of these can, separately or in combination, cause eye discomfort.

12. Sign-off
